

METROFLOR CORPORATION: DESIGN THAT PERFORMS

Company Overview

Norwalk, CT -- Metroflor Corp. is committed to bringing the latest trends in Luxury Vinyl Tile (LVT) flooring to market with the utmost functionality, style and pricing to fit every budget. The company continuously searches the globe for floors that make a statement through style, texture and color. From start to finish, Metroflor flooring measures up to the highest standards of style, performance and value...every step of the way.

Metroflor products are uniquely created to last, whether for a residential or commercial application – and virtually all are suitable for both. The company offers a diverse portfolio of LVT flooring options for Retail, Hospitality, Educational, Multi-Family, Assisted Living, Healthcare/Hospital, Office Park, Corporate and Residential environments. Never sacrificing aesthetics for performance, Metroflor captures the best natural looks in wood, stone and tile through innovative manufacturing processes that ensure beauty, comfort, easy care and longevity.

Flooring components feature vinyl-backed, printed film and a thick wear layer fused together under high heat and pressure, creating a solid mass that will wear for many years. Computer controlled production assures the finest results. Metroflor's long-wearing floors are guaranteed to stay dimensionally stable, withstand wear and most household chemicals, maintain color fastness, and most require no waxing.

QUALITY CONTROL

- All products are made from high-quality components with special regard for easy maintenance and affordability.
- Utilizing the latest technology and best practices available, the company continuously upgrades facilities to be the category leader.
- All products achieve the latest international standards and quality assurances based on ISO 14001, ISO 9001 and ISO 9002.
- In-house laboratory testing confirms the final product's quality points: lamination strength, stability, color fastness, color matching, dimensional conformity, resistance to chemical reagents, and durability.
- Thick, clear wear layers offer years of carefree enjoyment.
- Homeowners can get up to a lifetime warranty, thanks to the strong composition of wear layers combined with the advanced manufacturing process.

ENVIRONMENT

- Most products are FloorScore certified and provide excellent indoor air quality with little or no VOCs.
- Recycled vinyl is used when possible, taking the initiative to help preserve our environment.

METROFLOR®

C O R P O R A T I O N

- Non-allergenic flooring does not promote fungal growth and can be totally recycled.
